GGSI Technical Publication Services Signs Contract With Innovative Solutions & Support, Inc. for Avionics Documentation

Contract Centers on ATA Standards-Compliant Component Manuals for Three Major Carriers

YORK, PA – GGS Technical Publication Services, a division of GGS Information Services, recently entered into an agreement with Innovative Solutions & Support, Inc., of Exton, PA, for the development and production of technical documentation for major avionics equipment for use aboard commercial passenger aircraft.

The contract directs GGS Technical Publication Services to produce Level 2 Component Maintenance Manuals (CMMs) for flight deck instrumentation for DC-9 and Boeing 757/767 class of aircraft in service with three major U.S. flag carriers.

The documentation produced will be Air Transport Association (ATA) standards compliant, and in accordance with ATA's 'iSpec 2000' requirements – a recently developed single technical data information standard for commercial and military applications. The work requirements will center on technical information relating to components such as air data display units, altitude alerters, fuel quantity indicators, display units, display control panels, and data concentrator units.
